Professional Summary

Threat Intelligence Researcher at Atos Threat Research Center (TRC) with 2+ years of experience in Cyber Threat Intelligence (CTI), Managed Detection and Response (MDR), adversary research, and threat analysis. Holds CEH Master (ECC1695074823), Google Cybersecurity Certificate, and Certified Defensive Security Analyst (HTBCERT-7C1CC3F451); proficient in MITRE ATT&CK, Cyber Kill Chain, OSINT, VAPT, malware analysis, and threat hunting.

Work Experience

Atos (Paladion Networks Pvt. Ltd.)

Associate – Threat Intelligence Researcher (Atos TRC)

Jan 2026 – Present

Bengaluru, Karnataka, India | Hybrid

- Conducting in-depth Adversary Research and Cyber Threat Intelligence (CTI) through the newly launched Atos Threat Research Center (TRC).
- Delivering actionable research and intelligence on the latest trends and threats in collaboration with Atos TRC.

Atos (Paladion Networks Pvt. Ltd.)

Associate – Threat Intelligence Analyst (SPOT Award)

Jul 2025 – Feb 2026

Bengaluru, Karnataka, India | Hybrid

- Supported threat intelligence operations with a focus on Managed Detection and Response (MDR), threat analysis, and related investigations.

Eviden (Paladion Networks Pvt. Ltd.)

Junior Associate – Threat Intelligence Analyst (SPOT Award x2)

Mar 2024 – Jul 2025

Bengaluru, Karnataka, India | Hybrid

- Worked with Cyber Threat Intelligence (CTI) teams affiliated with Eviden/Atos across the globe and helped vendors stay updated on the latest reported and unreported threats and vulnerabilities.

Certifications & Publications

- **Certified Ethical Hacker Master (ECC1695074823)** – EC-Council [\[Link\]](#)
- **Certified Defensive Security Analyst (HTBCERT-7C1CC3F451)** – Hack The Box [\[Link\]](#)
- **Google Cybersecurity Certificate** – Google / Coursera [\[Link\]](#)
- Machine Learning – Simplilearn [\[Link\]](#)
- (VAC) Elliptic Curve Cryptography in Data Security [\[Link\]](#)
- **Publication:** MyDeed – A Blockchain Based Storage Solution for Official Documents (IJRPR) [\[Link\]](#)

Projects

myDeed – Web3 File Storage and Management on Blockchain

Tools used: Solidity, HTML, JavaScript, CSS, Metamask, Hardhat, Pinata

- Designed and deployed a scalable Decentralized Application (Dapp) on the Sepolia testnet, achieving 100% autonomous data ownership for file owners and 50% access control for users with shared permissions.
- Implemented a real-time file-view and access-revocation feature using IPFS and JavaScript, reducing user ambiguity by 60% by storing file metadata on the blockchain.
- github.com/myDeed/myDeed – Link to the project

Education

Presidency University, Bengaluru, Karnataka

Bachelor of Technology – Computer Science and Engineering (Cyber Security)

August 2024

CGPA: 8.64 / 10.00

- **Relevant Coursework:** Data Communications and Networks, Database Management Systems, Engineering Economics, IDPS, Web Security, AI and ML, Operating Systems, Data Structures and Algorithms, Cyber Forensics, Cryptography and Network Security, Cyber Threats for IoT and Cloud, Design Analysis and Algorithms

V.V.S Pre-University College, Bengaluru, Karnataka

Physics, Chemistry, Mathematics, Computer Science – 2nd PUC / 12th Standard

April 2020

Percentage: 85.5%

Skills

Cybersecurity Techniques: Vulnerability Assessment and Penetration Testing (VAPT), Malware Analysis, Network Security, Threat Hunting, Cryptography Fundamentals, Cyber Threat Intelligence (CTI), Cybersecurity Frameworks (MITRE ATT&CK, Cyber Kill Chain), Open Source Intelligence (OSINT), Dark Web Fundamentals

Programming or Scripting Languages: Python, C, C++, HTML, JavaScript, CSS, MySQL, Solidity

Technologies and Tools: Kali Linux, Wireshark, Metasploit, Burp Suite, Reverse Engineering Tools (IDA Pro, Ghidra), Google Cloud Platform, Web3.js (Blockchain Security), KQL (Kusto Query Language)

Concepts: Operating Systems (Windows, Linux), API Security, Database Normalization, Agile Methodology, Cloud Security, Object-Oriented Programming (OOP), Secure Coding Practices, Managed Detection and Response (MDR)
